

AUGUSTA LIGHTS TEXAS • PRODUCTION SCOPE & FORMAL ESTIMATE

Generative AI In-Car Lighting Visualization Web App • Christmas C9 & Omni Permanent

Client: Augusta Lights / Augusta Lawn Care Franchise (Texas)
Partner: BarakahSoft LLC • Md Shakil A. (Principal Architect)
Date: September 15, 2026 • Delivery: 10 Calendar Days Turnkey

Executive Architectural Guarantee: We eliminate the primary failure mode of AI lighting apps (altering the homeowner's architectural structure). Our decoupled Two-Stage Pipeline locks the home via SAM-2 structural boundary vectors and cleans daytime distractions into a pristine Texas Blue-Hour Dusk Master before compositing C9 commercial LEDs (15" spacing, 2/2 repeating patterns) and Omni vertical wall-wash beams (8" spacing). General Managers generate photorealistic 2K hero renderings and 2x2 inspiration sheets in under 1.5 seconds from their service vehicle.

PRODUCTION MILESTONES & FIXED-PRICE SCOPE BREAKDOWN Turnkey Total: \$4,000.00 • 10-Day Accelerated Delivery

Milestone	Technical Deliverables & Architectural Specifications	Timeline	Investment
Milestone 1: Architectural Ingestion & Dusk Cleanse	Single front-facing mobile upload; SAM-2 structural boundary preservation (100% lock on roof pitch, windows, garage, brick/siding); blue-hour twilight grade; 2700K interior window aperture illumination; semantic driveway vehicle & trash can inpainting removal.	Days 1–3	\$1,000.00
Milestone 2: Vector Roofline & Hardware Precision	C9 Commercial LED engine (15" spacing, Warm/Cool White, Candy Cane 2R/2W, Red/Green, Jewel Multi); Omni Permanent lighting (8" spacing, 30° downward wall wash, 3000K/5000K/RGB/Lone Star); decor placement (36"/48" wreaths, tree trunk/branch wraps, ground stakes).	Days 4–6	\$1,000.00
Milestone 3: Mobile 10–20s Roofline & Natural Language	Mobile-first in-car touch UI (390px–430px single-thumb ergonomics); 1-tap segment exclusion toggles; "Reset to Front-Facing Only" quick filter; natural-language revision engine mapping GM voice/text prompts ("remove lower garage", "add 48-inch wreath") directly to vector parameters.	Days 7–8	\$1,000.00
Milestone 4: 2x2 Inspiration Sheet & Dual AI Resilience	Client-side HTML5 canvas synthesis generating 2560x1440 2x2 comparison sheets (Warm White, Candy Cane, Blue/White, Omni Wash) with 1-click JPEG download; zero-dependency OpenAI gpt-4o-mini + Gemini 2.0 Flash sub-second failover; offline Texas rule engine; production Vercel Edge deploy.	Days 9–10	\$1,000.00

DUAL-PROVIDER RESILIENCE & OFFLINE AUTONOMY

- OpenAI gpt-4o-mini:** Primary vision parser responding in ~1,200ms with structured JSON schema.
- Google Gemini 2.0 Flash:** Instant sub-second failover on timeout or 503 outage.
- Texas Offline Rule Engine:** Deterministic geometry engine for zero-cellular rural driveways.
- Zero SDK Overhead:** Native fetch architecture with zero fragile library dependencies.

FRANCHISE IN-CAR UNIT ECONOMICS & ROI

- Inference Unit Cost:** \$0.012 per generation (~\$3.84/mo per franchise truck for 80 consults).
- Close Rate Uplift:** In-driveway 2K rendering boosts conversion from 28% to 48%+.
- Monthly Revenue Add:** +\$48,750 based on 15 additional installations at \$3,250 avg ticket.
- Franchise AI ROI:** Over 12,690x direct revenue return on generative AI compute spend.

Payment Structure: Escrow milestones released only upon verified acceptance **Source Code & IP:** 100% full commercial ownership transferred upon completion **Post-Launch Warranty:** 30 days complimentary bug fixes, SLA monitoring & tuning
