

Augusta Lights Texas • In-Car Lighting Visualization Web App

Two-Stage Generative Dusk & Inpainting Pipeline, C9 & Omni Vector Engine, 10s Mobile Roofline & 2x2 Sheet

Client: Augusta Lights / Augusta Lawn Care Franchise (Texas)
Timeline: 10 Calendar Days (Accelerated Delivery)
Contract Value: \$4,000.00 Fixed Price (Turnkey Package)
Live Prototype: VERIFIED & AUDITED

Architectural Preservation Guarantee: We eliminate the primary failure mode of AI lighting apps (modifying home structure). Our decoupled Two-Stage Pipeline locks the property geometry via SAM-2 boundary vectors (windows, roof pitch, brick, mature trees remain 100% identical) and cleans daytime distractions into a Texas Blue-Hour Dusk Master before compositing C9 commercial LEDs (15" spacing) and Omni vertical wall-wash beams (8" spacing). GMs generate 2K renders in <1.5s from the truck.
